

# The IoT Inc Business Meetup Silicon Valley

*Opening remarks and guest presentation*

Join us on November 5 at 6PM PST

## The IoT Food Chain

Picking the Right Dining Partner is Important

**Dean Freeman**  
Gartner Research

IoT Inc. Meetup

Bruce Sinclair (Organizer): [bruce@iot-inc.com](mailto:bruce@iot-inc.com)

# Target of Meetup

**For business people selling products and services into IoT**  
but of course everyone else is welcome: techies, end-users, ...

**Focus of presentations and discussions:**

**Business Models**  
**Support**  
**Marketing**  
**Sales**  
**Distribution**  
**Finance**  
**Post Sales**  
**Pre Sales**

Hosted by: Br

## Reviews

- Help attract great speakers and members
- If you've been attending for a while and like the group, go to homepage to leave a review

## Help for our sponsor

- Need to justify their continued support
- Plug and Play are looking to partner with companies big and small

## Become a sponsor

## Suggest locations to hold future meetings

# Two-Day IoT Workshop

Bruce is delivering his 2-day intensive workshop

**"From Concept to Plan to Proof of Concept"**

Mountain View Computer History Museum on **Dec. 14-15**

Details at: <http://www.iot-inc.com/training>

Register at: <http://iotworldevent.com/academy/2015/>

# Coming Up

**Next Meeting, First Thursday of December -> 3RD**

Hima Mukkamala, Head of Engineering, Predix

*Hey IT, Meet OT*

Discount codes available for:

**RE-WORK**

San Francisco - Nov. 12 – 13

San Jose - Dec. 2 - 3

Presentation, recording, video and announcements for today's meeting will be sent in one week to everyone who provided their email

My email: [bruce@iot-inc.com](mailto:bruce@iot-inc.com)

Join us on November 5 at 6PM PST

# Key Issues

---

- What does the IoT food chain look like?
- How to enjoy the meal.

# What Is Digital Business?

---

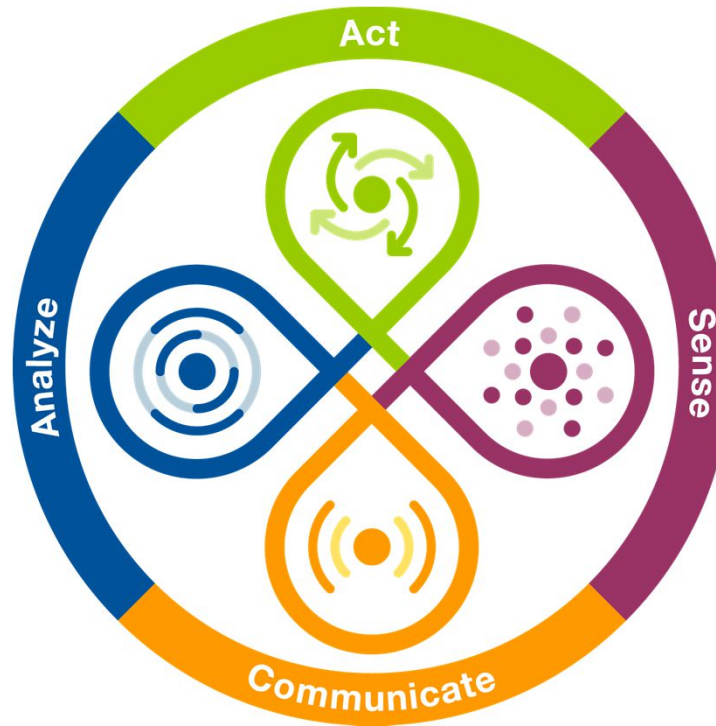

The creation of **new business designs** reached by blurring the digital and physical worlds ... via an unprecedented convergence of people, business and things.

# The Internet of Things Is the Accelerant

**2009**

**1.6 Billion  
Personal Devices**

**0.9 Billion Internet  
Connected Things**

**2020**

**7.3 Billion  
Personal Devices**

**30 Billion Internet  
Connected Things**

**Things Connected  
to the Internet Will  
Outnumber People  
by at Least 5 to 1**

# What is IoT?

The IoT is the network of *dedicated*\* physical objects that contain ...

- Embedded technology, to ...
- Sense or interact with their internal state or external environment.

The IoT comprises an ecosystem that includes things, communication, applications and data analysis.

\*Excludes general purpose devices such as PCs and smartphones

# The Internet of (Very Different) Things

- Expect 8 billion shipments in 2020.
- Many smart versions of existing product markets.
- Key challenge: Where to focus?

Shipments in 2020  
(millions of units)

(Selected items for illustration)

# The IoT Hype Cycle Points to the IoT Journey

- Nearly unprecedented hype around IoT
- Unclear value propositions
- Difficult IoT deployments
- Steps to take to avoid the “trough”

# IoT Food Chain

# IoT Infrastructure

- Silicon device manufacturers
- Goal: Get silicon into as many things, and gateways as possible
  - Develop maker platforms
    - Arduino
    - Raspberry Pi
    - Edison
    - Others
  - Security

# IoT Infrastructure

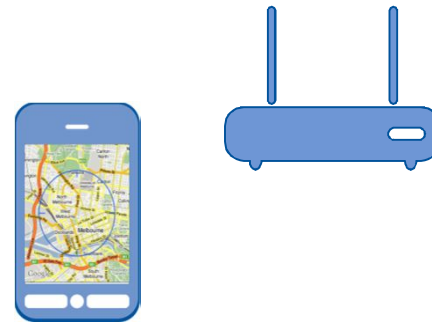

- Things
- Goal: Build things/Devices and potentially capitalize on application.
  - Use maker platform
  - Develop application
  - Develop/partner for infrastructure
  - Make Money
- Ultimate goal is to provide service

# IoT Infrastructure

---

- Gateways
- Goal: gain profit in moving data from edge to the cloud.
  - Router/Server
  - Platforms
  - Analytics
  - Cloud
  - Security

# IoT Infrastructure

---

- Middleware
- Goal: gain profit in moving data from edge to the cloud.
  - Software
  - Rules
  - Aggregation

# IoT Infrastructure

---

- Communications
- Goal: Increase revenues by providing data services.
  - Cellular or wireless services for data transfer
  - Communication protocols.
  - Optimize for mobile IoT uses/fleet management
  - Fixed asset uses

# IoT Infrastructure

---

- Cloud Providers
- Goal: Provide data services and storage
  - Analytics
  - Privacy
  - Storage
  - Platforms

# IoT Infrastructure

---

- Services
- Goal: Create an IoT infrastructure that is seamless to the client
  - Software from edge to the Cloud
  - Consult/Provide applications
  - Cloud services
  - Analytics
  - Predictive modeling

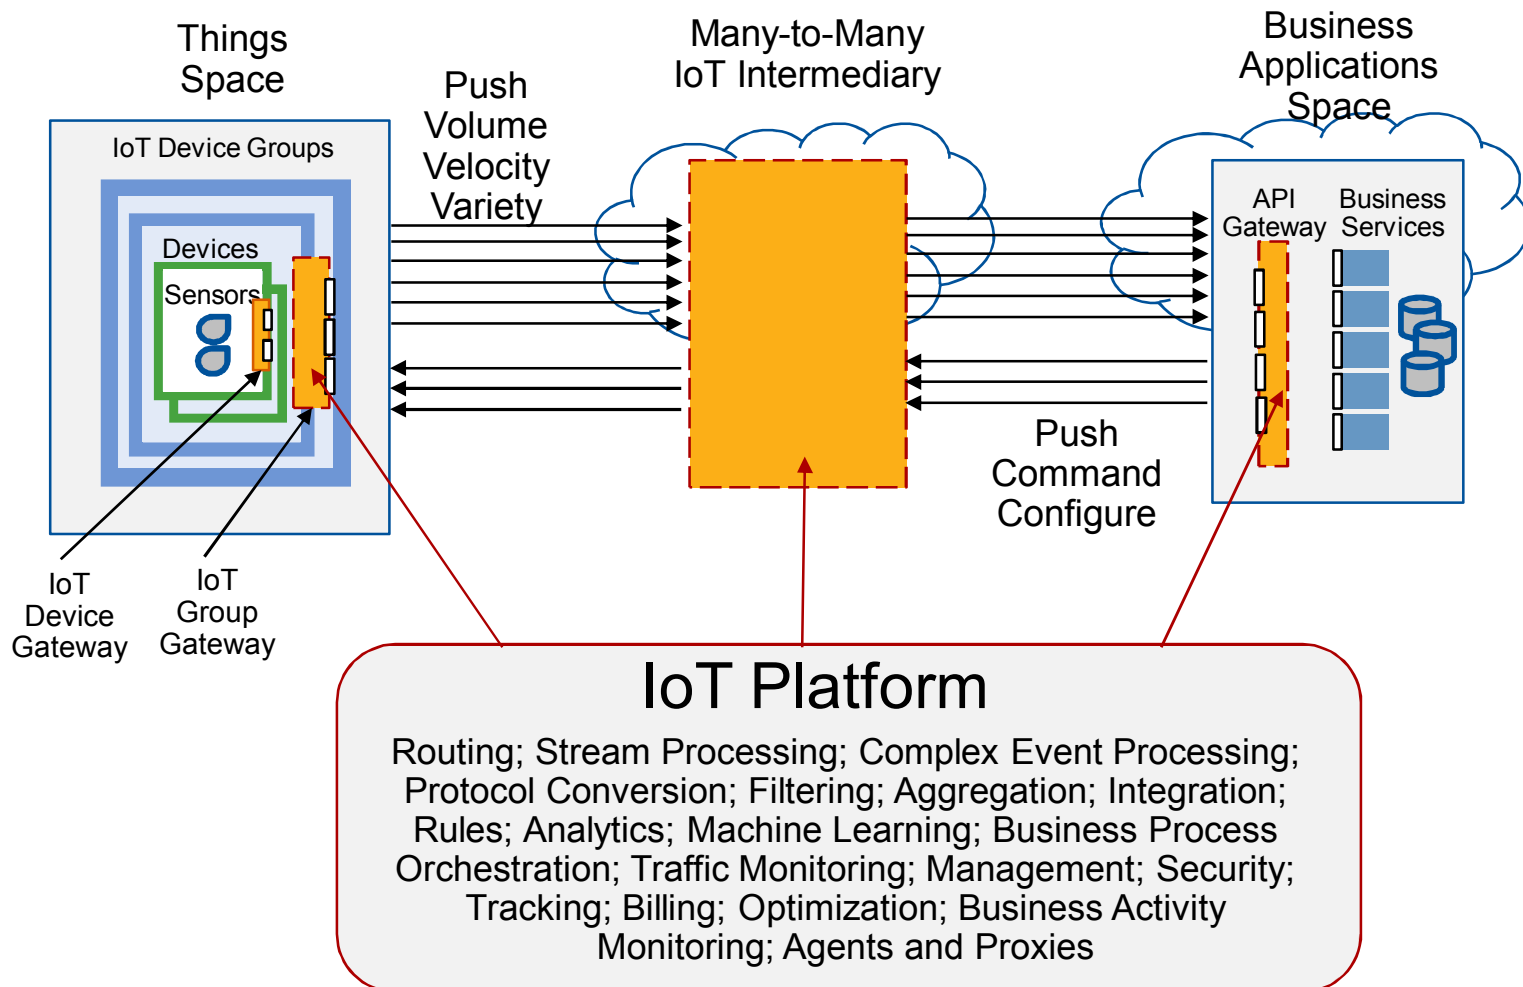

# IoT Infrastructure

---

- The IoT infrastructure is tightly interlinked and must operate smoothly
- Security at each handoff is critical

# Platforms, Critical for a Good Meal

# Internet of Things: Platform Architecture

CONFIDENTIAL AND PROPRIETARY

Gartner

# Why Do I Need an IoT Platform?

- Business

- I'm trying to connect to my things to
  - Improve my processes or costs
  - Drive new revenues
  - Meet management or regulatory requirements

- Technical

- I need to connect to my:
  - External
    - Products
  - Internal
    - Legacy things
    - Heterogeneous things
    - Legacy IoT Platforms

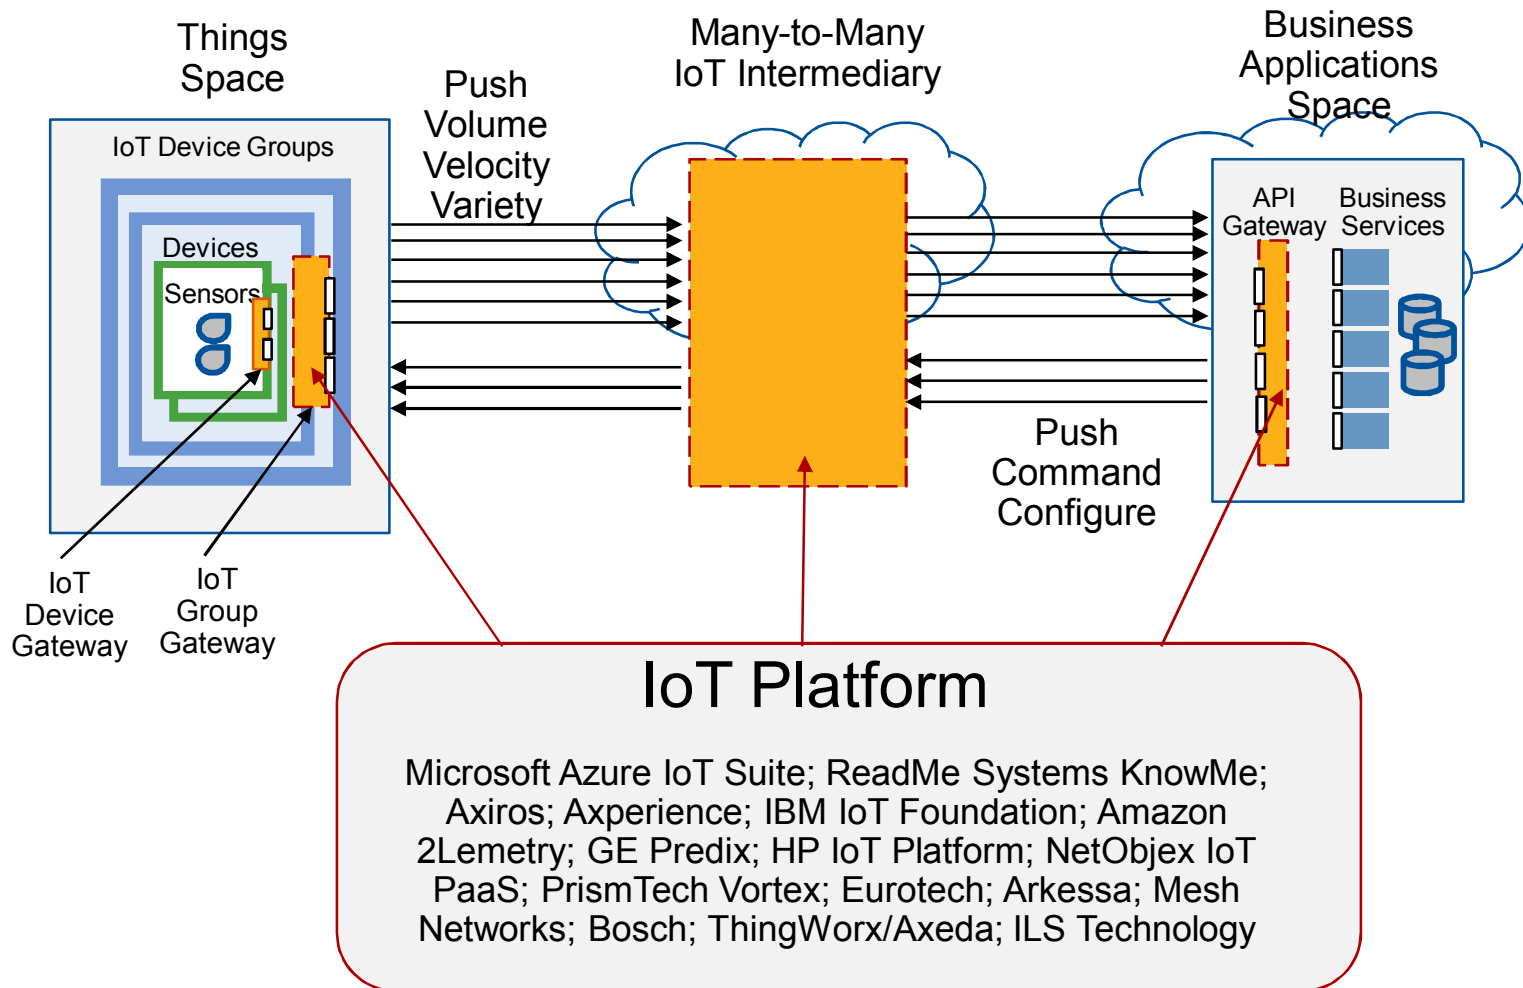

Unless I have a business need, I will use a 3<sup>rd</sup> party solution

# IoT Platforms Are A Key Building Block for a Digital Business

---

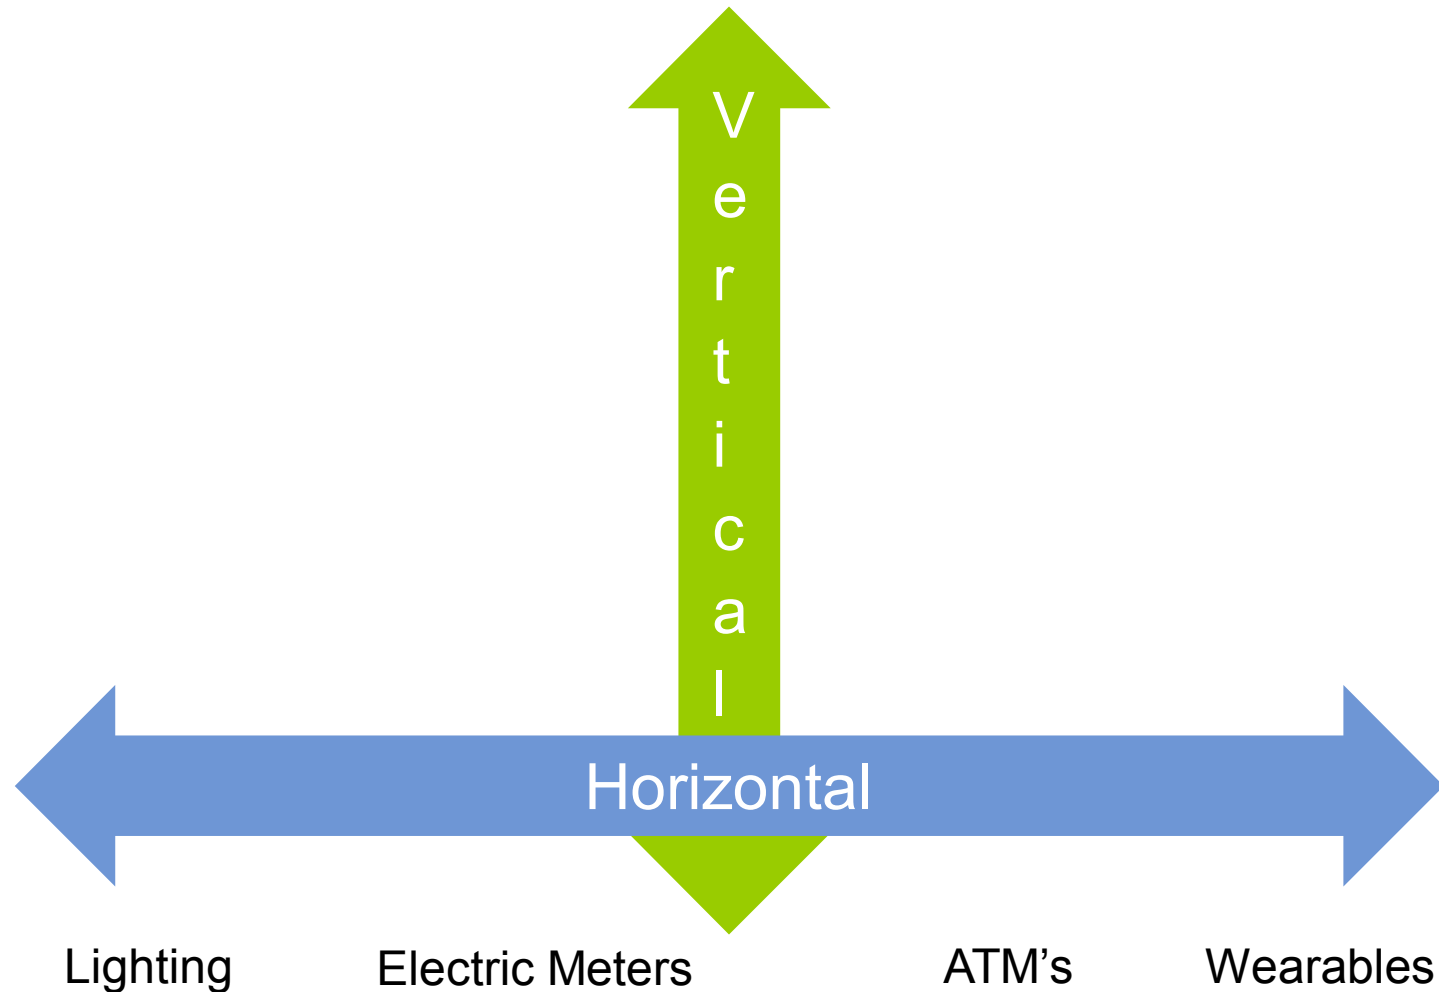

- IoT Platforms:
  - Monitor, control & manage IoT Endpoints & their software
  - Aggregate and analyze IoT Endpoint data – all which collectively renders a desirable business outcome, e.g., predictive maintenance.
  - Bridge between IoT end-points and enterprise applications, data bases and other back-end environments
  - Technically, IoT Platforms accomplish this via some combination of device management, IoT-focused middleware (e.g., aPaaS, iPaaS), and some combination of security, APIs, application development, business rules, CEP, UI, analytics and visualization tools.

# Internet of Things: Platform Architecture

# For Success Platforms Must be Versatile

---

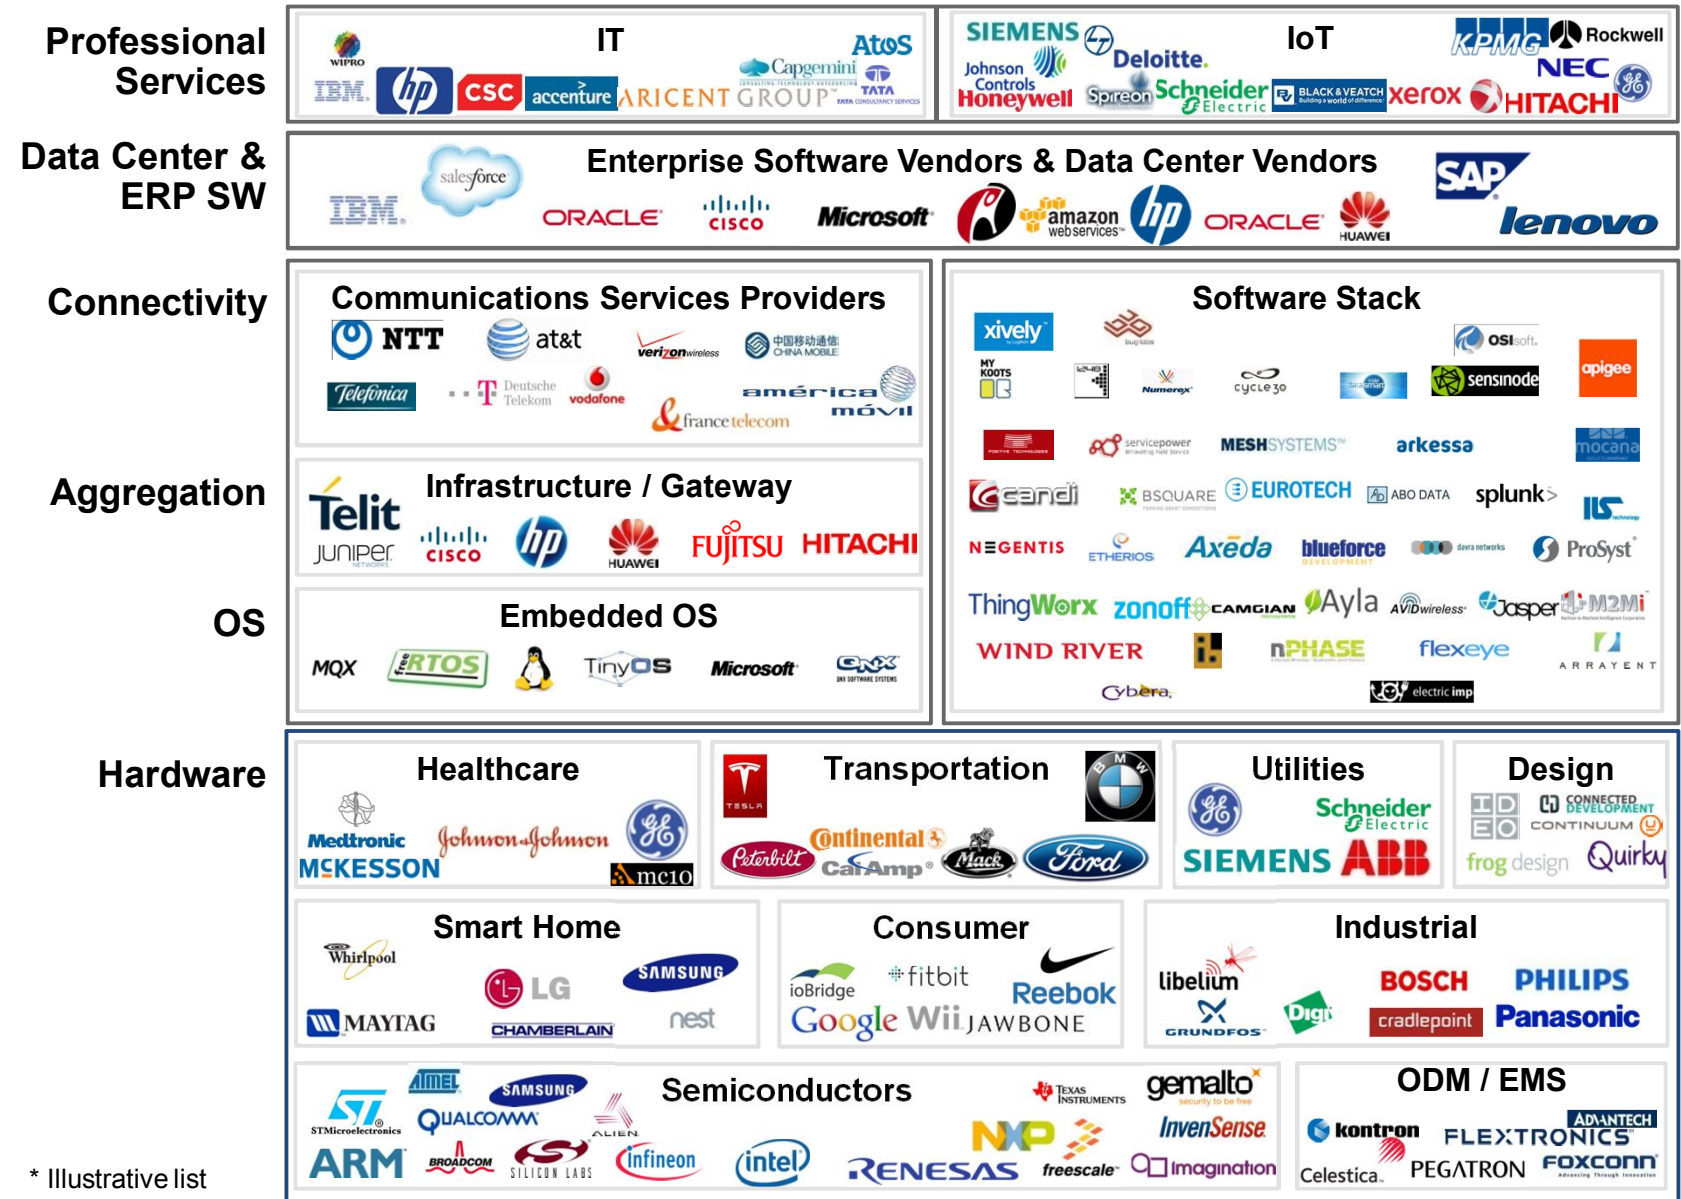

# Key Issues

---

- What does the IoT food chain look like?
- How to enjoy the meal.

# A Crowded IoT Ecosystems ... Partnerships Are Critical to Succeed

\* Illustrative list

# Behind Every IoT Project There is a Business Priority

---

## Digitizing Your Business

CONFIDENTIAL AND PROPRIETARY

**Gartner**

# IoT Uses

## Optimize

- Asset performance management
- Mobile workforce management
- MRO reduction

## Charge

- Dynamic pricing
- Transactive and P2P energy
- Beyond the meter services (EV, EE)

## Operate

- Distributed energy resource mgmt
- Emergency restoration operations

## Extend

- Home energy management
- Demand response automation

## Engage

- Energy efficiency
- Self-service

# IoT Benefits

Improve  
Operations

Enhance  
Services

Optimize  
Assets

Generate  
Revenues

Conserve  
Resources

Increase  
Engagement

Improve  
Well-Being

Provide  
Security

# Applications Drive the Intelligence

On, Off, Dimming

Gunshot detection,  
Video, Weather

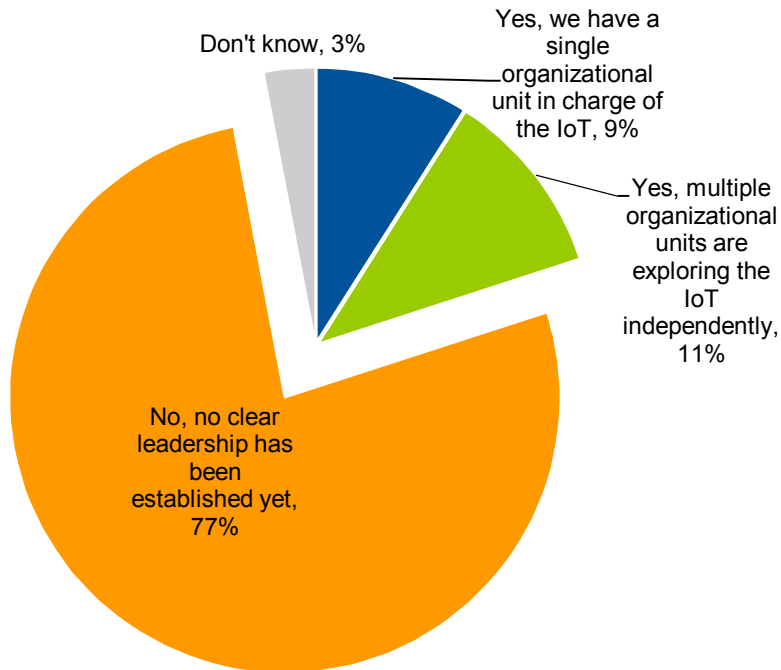

# Despite the future importance of the IoT, few organizations have built governance for the IoT and more than half have no plans to establish a COE for the IoT

n=456

Q. Has your organization established leadership for its IoT efforts?

## Established Leadership

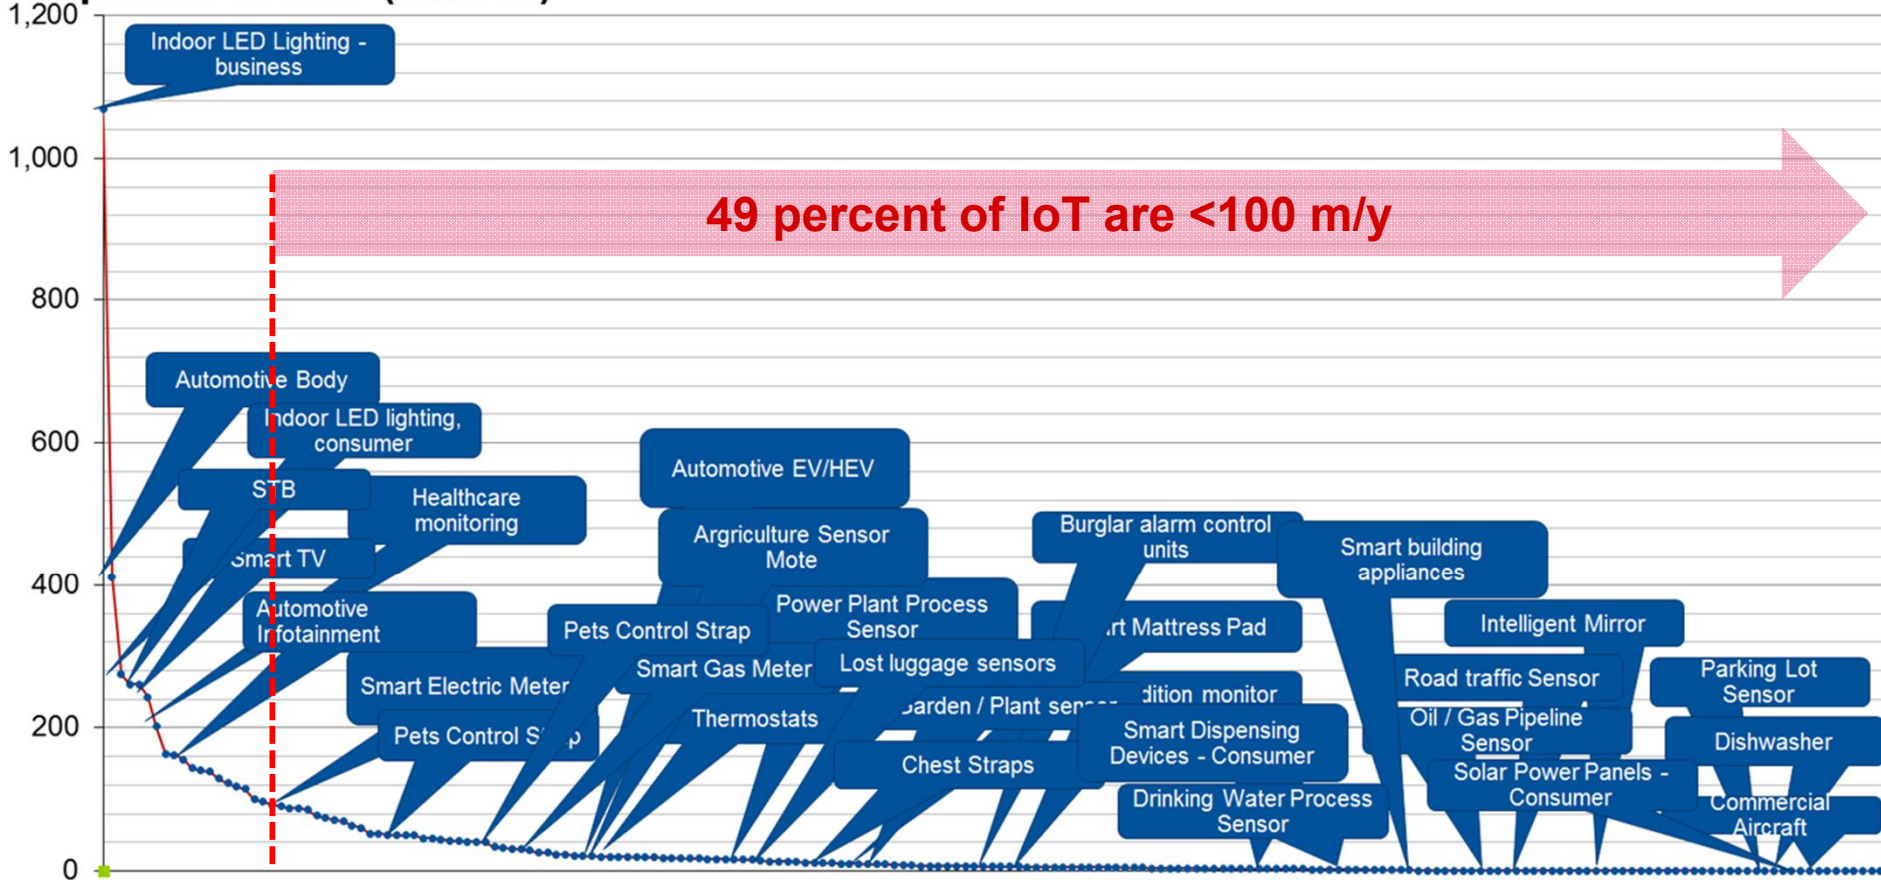

Q. Have you established a Center of Excellence (COE) for the IoT?

## Established Center of Excellence

# Many Markets, Limited Opportunity, Choose Carefully

Shipments in 2020 (Millions)

# Wrap up

---

- The IoT is a complex interwoven food chain
- Partnering is critical to insure success
- Business opportunities abound
- Semiconductor opportunity high volume low cost

# Recommendations- To Enjoy the Meal

---

- ✓ Develop your initial IoT architecture and policy by EoY 2015:
  - Use this to create use case scenarios
- ✓ Use the IoT to Develop your Digital Business Strategy
  - Experiment with IoT to establish business value on an internal / external basis
- ✓ Identify your Potential Dining Partners
  - Start with your existing partners, then branch out

# Enjoy the Meal!
